

REMARKS

By the present Supplemental Preliminary Amendment, minor revisions have been made in the specification and claims 1-21 have been replaced with new claims 22-34. The new claims are supported by the specification. For instance, original claim 1 recited, *inter alia*, " a cationic photopolymerization initiator (A), a cationically polymerizable compound (B), a cyclic polyether compound (C) and another organic compound (D), wherein the amount of (B) and the amount of (C) are 1.0 to 99.9% by mass and 0.0 to 10.0% by mass, respectively, both based on the sum of (B), (C) and (D)". Examples 1-3 in the Table provided on page 9 do not contain either (C) or (D) and Examples 4-6 do not contain (D). Therefore, new independent claim 22 recites the composition as comprising, *inter alia*, components (A) and (B). New independent claim 24 recites a composition which comprises (A), (B) and (C) with (C) being in an amount consistent with that disclosed on page 15. New independent claim 26 recites a composition which comprises (A), (B) and (D) (the amount of (C) can be 0% as disclosed on page 15, lines 8-9) with (B) comprising a compound containing an oxetanyl group in an amount which was recited in original claim 1 and disclosed in the last paragraph on page 13. Independent claim 28 recites a composition which comprises (A), (B), (C) and (D) consistent with Examples 7-9 and the description provided on pages 13-15 and page 19, lines 1-12. The dependent claims follow the original dependent claims and are also supported by the specification such as at page 20, lines 13 and 16 and the paragraph which bridges pages 4 and 5.

Favorable consideration on the merits is respectfully requested.

Should the Examiner wish to discuss any aspect of the present application,
the Examiner is invited to contact the undersigned attorney at the number provided
below.

Respectfully submitted,

BUCHANAN INGERSOLL PC
